

A B S T R A C T

The assembly (10) comprises a hand truck (12) forming a bell-crank lever pivoted about an axis formed by support elements (16), the lever comprising a base (18) forming a first arm of the bell crank, and a frame (20) forming a second arm of the bell-crank. It also comprises a container (13) that can be separated from the truck (12). The assembly further comprises a compartment (22) provided on the container for fastening the container (13) onto the truck (12) in such a manner that the container (13) can bear equally well on the base (18) and on the frame (20).
